

Digital Forensic Report — Case CASE-DEMO

Generated (UTC): 2026-07-07T20:53:55.178607+00:00

Evidence ID	demo_evidence.png
Analyst	automated-pipeline
Overall verdict	LIKELY_SYNTHETIC
Overall confidence	93%

Evidence Description

Demo still image submitted for synthetic-media forensic analysis.

Manipulation Markers Detected

Marker	Confidence	Detail
color_channel_corr	63%	Unusually high cross-channel noise correlation, atypical of independent raw sensor noise per color channel
high_freq_energy_ratio	99%	Elevated high-frequency spectral energy relative to baseline, consistent with GAN/diffusion upsampling artifacts
